Admin on Windows,  
Linux

Familiar with Git and  
github vcs

Experience working  
with groups in a  
teaching role

Experience installing  
and maintaining a  
variety of Operating  
Systems

## PERSONAL PROJECTS

### Adventure Tours

This website was meant to showcase the power of CSS. It was designed for an adventure tours company to showcase tour packages, client reviews and more. I am very proud of this one. Technologies used are HTML, CSS and SASS. Available on my GitHub, <https://seftel72.github.io/Adventure-Tours/>

### Monster Rolodex

This website demonstrates some of the simple features of an SPA (single page application) built with the REACT framework. It allows the user to use a search box to filter through a list of dynamically generated images.

\*more are available on request.

## EDUCATION

### Conestoga College, Kitchener, ON

Enrolled in a variety of night courses in order to learn C++, C# and Javascript.

### Self Directed, Online Bootcamps

I have continued a self directed learning path staying on top of current tech as it evolves over many years. Utilizing a variety of valuable sources such as **Harvard University's** online Computer Science program. **Freecode Camp**, **Udemy**, **Frontend Masters** and many more..
